# Bus and Train Ticket Booking Interface

## 1. Introduction

The Bus and Train Ticket Booking Interface is a travel booking website designed to help users view bus and train services and enter their travel details easily. The website includes source and destination fields, travel dates, passenger details, available services, fare information, and seat-selection layouts. It is developed using HTML and CSS to provide a simple, attractive, and user-friendly interface.

## 2. Features

- Source and Destination: Allows users to enter their starting point and destination.
- Travel Date: Provides fields to select the journey date.
- Passenger Details: Allows users to enter passenger information.
- Available Services: Displays available buses and trains with their timings.
- Fare Information: Shows ticket prices for different travel services.
- Seat Selection: Provides a layout for viewing and selecting seats.
- Responsive Booking Cards: Displays travel options in an organized format.
- User-Friendly Design: Uses forms, tables, and CSS styling for easy navigation.

## 3. Applications

1. Online Travel Booking: Helps users view and choose bus and train services.
2. Travel Agencies: Can be used as a basic interface for displaying travel options.
3. Transport Services: Helps present schedules, fares, and seat availability.
4. Educational Projects: Demonstrates the use of HTML forms, tables, and CSS layouts.
5. Travel Planning: Helps users organize journey details in one place.

## 4. Future Scope

- Add a database to store passenger and booking details.

- Implement real-time bus and train schedules.
- Integrate online payment facilities.
- Add user registration and login features.
- Provide live seat availability and reservation confirmation.
- Develop a mobile-friendly application.
- Send booking confirmation through email or SMS.

5. Source Code

## 7. Conclusion

The Bus and Train Ticket Booking Interface demonstrates how HTML and CSS can be used to create a basic travel booking website. It provides an organized display of travel details, available services, passenger information, fares, and seat-selection layouts. This project helps develop practical knowledge of website design and can be enhanced with database connectivity and booking functionality in the future.
